WESTFIELD

WSC going wireless

Wireless Internet access will be available throughout the Westfield State College campus, indoors and out, by the time classes resume next fall, officials said.

President Evan S. Dobelle recently authorized a new project to provide Web access for students, faculty, staff and visitors throughout all 23 buildings and outdoor areas on the 256-acre campus.

"We believe it will make a big difference in allowing students and faculty to do research, participate in on-line classes and check academic records anywhere and any time on our campus," Dobelle said in a press release.
